MIS Disaster Recovery Plan**

Policy Statement
The equipment, software systems, and databases that comprise the ePHI System are critical components that enable the [CSB] to function in an effective manner. The purpose of this plan is to provide the framework for recovering from any disaster that might affect these systems, to minimize downtime, and to assist users in meeting their critical processing requirements.

Implementation And Responsibility:
A. The decision to implement disaster recovery procedures is the responsibility of the MIS Director or his/her designee. The Disaster Recovery Team, see Attachment A, will convene as soon as possible after a disaster has occurred to assess damages and make recommendations to the MIS Director.
B. This plan is distributed by the LAN Manager to and used by those persons responsible for its implementation and operation. These individuals are identified in Attachment A, Disaster Recovery Team Members. This document will be maintained and updated by CSB MIS Staff whenever significant changes occur. Updates are performed at the direction of the MIS Director. The MIS Director forwards the updated document to the Executive Director for approval.

6.0 DISASTER RECOVERY PROCEDURES

This section should be used to specify "step-by-step" procedures to be followed in the event of a covered disaster event:

6.1 Communications Procedures

- Emergency contact information for employees, customers, vendors and any other groups or individuals as needed for plan support (including primary and alternate contact designations)
- Communications Step-by-Step: detailing the "disaster-related" use and availability of telephones, wireless devices, voicemail, email, intranet and the company web site.
- Escalation procedures to be followed in the event of a declared disaster considering the recovery and response "chain of command" and the use of one or more Command Center locations.
- Steps and procedures to provide ongoing "how-to" information during the crisis event (to keep staff informed on current status, and day-to-day business procedures).

6.2 Remote Access Procedures

- What types of job functions and internal operations can be performed from a home office location?
- What type of hardware and software will be required?
- Will end-users require any special training?
- How will alternate systems and remote access procedures be activated and communicated to end-users?

6.3 Technical Implementation Procedures

- How will systems be installed, configured and administered during a covered disaster event (considering alternate work locations and alternate operating procedures)?

6.4 Backup and Data Recovery Procedures

- How will backups be retrieved in the event of disaster plan activation?
